## CERTIFICATES

- 1) JavaScript by HackerRank, MyGreatLearning websites and CODE 365,
- 2) DSA by CODE 365

## PRACTICE PROJECTS

**(i)Project Name** — An Ecommerce Website(SmartBaajar)  
(in-process)

<github link : [Ecommerce\\_project.git](https://github.com/kishan-jain/Ecommerce_project.git) >

This project combines ExpressJs and NodeJs for the backend, MongoDB for the database, and React for the frontend.

**Backend :** In Backend This project works with full RestApi FrameWork. For interconnectivity with DataBase I Use all possible security Features like return limited user details for FrontEnd, best Authentication & Authorization practices, secure and accessible ordering system, separate Collection with some common details accessibility(product, order, payment etc) for user and seller . Use MongoDb Aggregation Method for Returning specific and useful Data.

**Frontend :** I make the most beautiful home and other pages like product item page, profile page, login-register page, order management page ect by using React Router module. For User and Seller I develop specific pages with specific Functions like product view, order, payment, tracking, cart, wishlist for users and product adding, order info, payment info, delivery, stock management for seller.

**(ii)Project Name** — Office Employee management system  
(in-process)

<github link : [Employee\\_management\\_project.git](https://github.com/kishan-jain/Employee_management_project.git) >

This project was made for managing human resources easily and effectively. In the Project for Backend I use ExpressJs and NodeJs and for FrontEnd I use EJS (Embedded Javascript) . In the project I include features like secure authorization, role-based access control, and a mail client within the application. In this system I make specific permissible profile page for separation HR, Manager, Admin, Owner. And make a fully accessible database and simple generatable by template with validators.

## SKILLS

- ★ C, C++, JAVA (Basics), Python(Advance)
- ★ MERN stack
- ★ JAVASCRIPT(Advance),
- ★ Node.js, React.js, Express.js
- ★ Django framework
- ★ RESTful API
- ★ HTML, CSS, Bootstrap
- ★ Mysql, MongoDB
- ★ Version\_Control(Git),

## EDUCATION

**B.sc. CA , PG College**  
**Tikamgarh**

JULY 2016 - JUNE 2019

Basics of Computer application, Desktop publication, MS office, Data structure, basic of Programming, c/c++ programming language, web page developing, DATABASE MANAGEMENT SYSTEM and other subject like PHYSICS, MATHEMATICS and MORAL DEVELOPMENT

**DCA, MCNUJC university**  
**Bhopal (M.P)**

JULY 2016 - JUNE 2017

Fundamental of computer system, Operating System, MS office, DATABASE MANAGEMENT SYSTEM, Data structure, basic of Programm web development
